

WaveSync

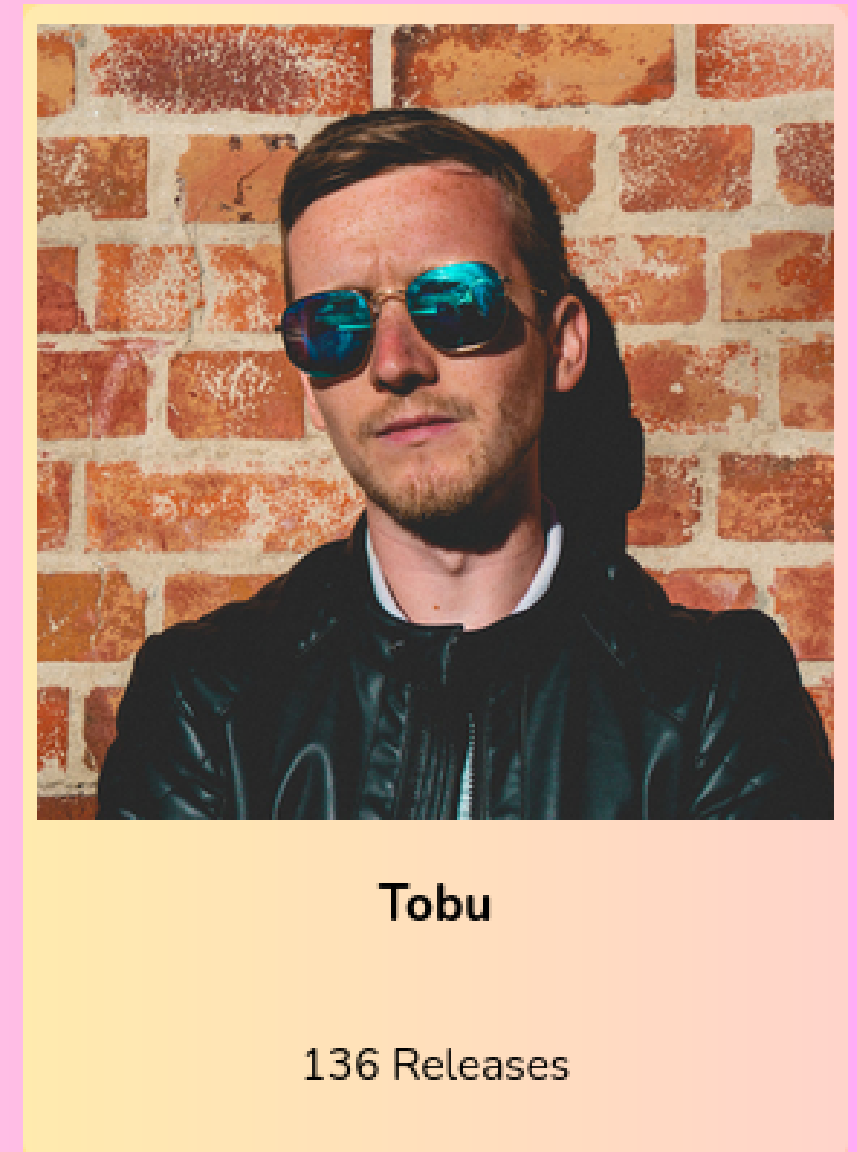

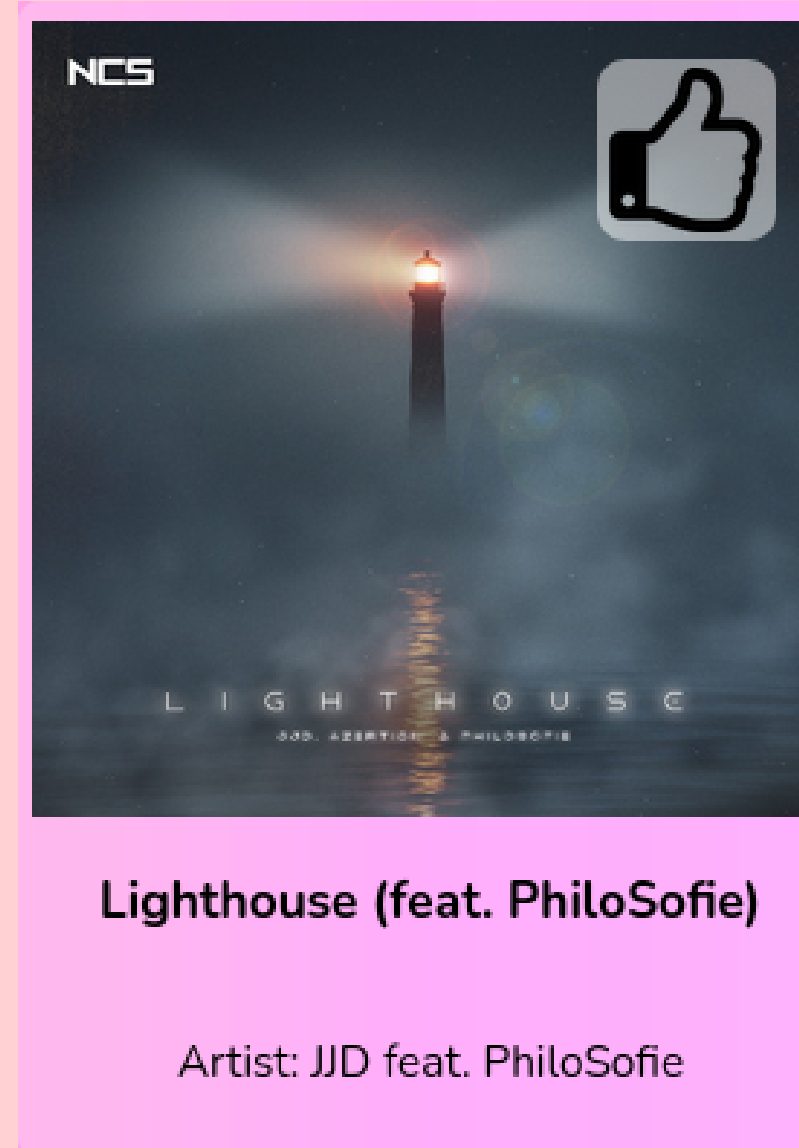

Listen to Music

By Clemens

Konzept

- Musik hören & neue entdecken
- Künstlerinformationen abrufen
- Musikwissen erweitern
- Neue Genres entdecken

Herausforderungen

- Modularität der Funktionen
- Skalierbarkeit (1080p, 1440p & 4K)

```
function displaySongData(data, count, idName) {
  const songsBox = document.getElementById(idName);
  console.log("ID name: " + idName);
  console.log("Count: " + count);
  songsBox.innerHTML = '';

  console.log(`Displaying ${count} result(s).`);

  let countTMP = 0;

  for (let i = 0; i < count && i < data.length; i++) {
    const song = data[i];
    const songElement = document.createElement('div');
    songElement.classList.add(`song${countTMP}`, 'songBox');
    songElement.innerHTML = `
      
      
      <h3 class="titleSong" id="titleSong${song.id}">${song.title}</h3>
      <p class="artistSong" id="artistSong${song.id}">Artist: ${song.artist}</p>
    `;
    songsBox.appendChild(songElement);

    countTMP++;
  }

  countTMP = 0;
}
```

Erster Prototyp - Finales Design

- Background-Gradient
- Design der Songs
- Elemente der Navbar
